About Me

With a humble attitude and adaptable mindset, an Information Technology role in real estate would be an ideal place to start my career. My school experience aided my ability to do multiple things related on software applications. I am eager to contribute and use my technical experiences.

Summary of Qualifications

- Decent in working under pressure and adapting to new situations and challenges.
- Decent in debugging certain code errors and therefore would participate in helping the team if there is a problem that occurs.
- Above average typing skill with a decent ability in listening to people and providing ideas to help them achieve a good result.
- Willing to learn more from people who have far more experience.

Education

Bachelor of Science in Information Technology

College of Sciences, Technologies and Communication Inc.

2026

Recent Information Technology graduate with experience in programming and graphic design. Proficient in using Adobe Illustrator to trace and recreate images and also has average knowledge in programming languages such as c# and c++. Eager to leverage my abilities and hands-on-experience to contribute my decent skills as an Information Technology
